EXPERIENCE

- Amazon | 2025-2026
- CSA retail Sep 2025 - Nov 2025
 - SDS Nov 2025 - Mar 2026

PROJECTS

1. Nexus  

(Self-Initiated) Oct 2025 -Present

 - A full-stack SaaS collaborative digital whiteboard built with React, TypeScript, and a Node.js backend, using MongoDB. Key features include an infinite canvas, real-time collaboration with Socket.IO, user authentication including Google OAuth, and content creation tools.
2. Chromaic (E-commerce + Admin Panel)  

(Self-Initiated) Feb 2025 - May 2025

 - A Gen Z-focused fashion e-commerce website with a custom admin dashboard. Built using React (Tailwind CSS), Node.js, Express, MongoDB, and Cloudinary. Users can browse, shop, and manage orders, while admins control products, categories, and analytics.
3. TalkSphere  

(College Major Project) Feb 2025 - Apr 2025

 - A real-time chat and meeting platform built using React, Tailwind CSS, Java, Spring Boot, WebSocket, and MySQL. Features include real-time messaging, dynamic room creation, friend requests, profile updates (name and profile picture), and secure login/logout functionality.
4. CartNova 

(Self-Initiated) Apr 2025 - Jun 2025

 - A furniture e-commerce site built with React and Tailwind CSS for frontend, and Spring Boot with MySQL for backend. Features include user authentication, wishlist, cart, and order. The admin panel allows adding/managing products, categories, and viewing orders details.

EDUCATION

- Techno Main Salt Lake | 2022-2025
- Bachelor of Computer Applications
